MEMORANDUM

1 The Public Advocates Office at the California Public Utilities Commission (“Cal
2 Advocates”) examined application material, data request responses, and other
3 information presented by Suburban Water System (“Suburban”) in Application (“A.”)
4 26-01-001 to provide the California Public Utilities Commission (“Commission” or
5 “CPUC”) with recommendations in the interests of ratepayers for safe and reliable
6 service at the lowest cost. This Report is prepared by Ms. Chandrika Sharma. Mr.
7 Suliman Ibrahim is Cal Advocates’ project lead for this proceeding. Mr. Hani Moussa is
8 the oversight supervisor. Mr. Corwin Hockema is the legal counsel.

9 Although every effort was made to comprehensively review, analyze, and provide
10 the Commission with recommendations on each ratemaking and policy aspect presented
11 in the Application, the absence of any particular issue from Cal Advocates’ testimony
12 connotes neither agreement nor disagreement with the underlying request, methodology,
13 or policy position related to that issue.

Chapter #	Description	Witness
1	Rate Base	Chandrika Sharma
2	Annual Projects	Chandrika Sharma
3	Advanced Metering Infrastructure (AMI)	Chandrika Sharma
4	Depreciation Reserve and Expense	Chandrika Sharma

1 **CHAPTER 1 RATE BASE**

2 **I. INTRODUCTION**

3 Unsupported costs should not be included in Suburban’s rates. It is also
4 unreasonable for Suburban customers to pay for assets that are not providing service or
5 assets that did not meet their useful service life.

6 **II. SUMMARY OF RECOMMENDATIONS**

7 Cal Advocates recommends:

- 8 • A rate base amount of \$320,479,262 in 2026, \$315,859,164 in 2027,
9 and \$342,538,755 in 2028.
- 10 • A reduction to rate base of \$1,838,825 for not used and useful assets.
- 11 • A reduction to rate base of \$4,149,691 for working cash.
- 12 • An increase to the depreciation reserve of \$933,040 for early
13 retirements.

14 **III. ANALYSIS**

15 **A. Rate Base**

16 In this GRC, Suburban proposes the rate base amounts as listed in table 1-1 below.

17 **Table 1-1: Adjustments for Rate Base**

18

Year	Suburban’s Proposed Rate Base Amount ¹	Cal Advocates Recommended Rate Base Amount ²	Difference
2026	\$335,977,922	\$320,479,262	\$15,498,660
2027	\$379,296,199	\$315,859,164	\$63,437,035
2028	\$445,251,505	\$342,538,755	\$102,712,750
Total	\$1,160,525,626	\$978,877,181	\$181,648,445

19
20

¹ RO model workbook “A.26-01-___”, sheet “MODEL.”

² A.26-01-001 Cal Adv RO Model.

1 The changes to the rate base balances are a result of Cal Advocates’ witnesses
2 recommended adjustments in this GRC.

3 **B. Suburban has Burdened its Ratepayers by Unnecessarily**
4 **Increasing its Working Cash**

5 There is no advantage of Suburban paying its property taxes early. In fact,
6 ratepayers are worse off when Suburban makes payments prior to the due date. The dates
7 Suburban has used to pay its property taxes are prior to the due date, also known as the
8 “if not received by or postmarked by date.” This means that as long as Suburban pays on
9 or by the due date, there will not be a penalty.

10 To determine the lag days for property taxes, Suburban uses payment dates prior
11 to the actual due date to calculate the number of days between service to payment, also
12 known as lag days. However, ratepayers would be better served if Suburban used the due
13 date because it would increase the lag days, which in turn would decrease working cash.
14 Table 1-3 shows the difference between Suburban and Cal Advocates’ calculations for
15 working cash to forecast costs for future years, where Cal Advocates uses the due dates
16 of 4/10 and 12/10 for the Los Angeles County and Orange County tax collector bills as
17 payment dates. Additionally, as shown in tables 1-2 and 1-3 below, Suburban has
18 burdened its ratepayers by increasing working cash by paying its Los Angeles County
19 Tax Collector property tax bill almost a month early on 11/12/2024, when the actual due
20 date was 12/10/24.

21

1

Table 1-2: Adjustments for Check Dates

Bill	Suburban's Payment Date ³	Actual Bill Due Date ⁴	Difference (Days)
Los Angeles County Tax Collector	04/01/25	4/10/2025	9
Los Angeles County Tax Collector	11/12/24	12/10/24	28
Orange County Tax Collector	04/01/25	04/10/25	9

2

Table 1-3: Adjustments for Working Cash

Year	Suburban's Calculations ⁵	Cal Advocates Calculations ⁶	Difference
2027	-\$3,152,513	-\$910,073	-\$2,242,440
2028	-\$2,818,781	-\$911,530	-\$1,907,251
Total	-\$5,971,294	-\$1,821,603	-\$4,149,691

3

4 Since there is no benefit to Suburban paying its property taxes prior to the due date
5 and doing so only increases rates for ratepayers, the Commission should reduce working
6 cash by \$2,242,440 in 2027 and \$1,907,251 in 2028. These calculations result in a
7 increase of weighted average property tax lag from 21.2 days to 39.7 days, which may be
8 achieved if Suburban simply dates its tax payment checks with the specified due dates.

³ RO model workbook "A.26-01-___", sheet "Lead-Lag."

⁴ [Payment of Secured Property Taxes | OC Treasurer-Tax Collector](#) and [Secured Property Taxes General Information – Treasurer and Tax Collector](#).

⁵ RO model workbook "A.26-01-___", sheet "MODEL."

⁶ A.26-01-001 Cal Adv RO Model.

1 **C. Ratepayers Should Not Fund Projects that are Not Used**
2 **and Useful**

3 Ratepayers should not fund an asset that does not provide service. In 2023 and
4 2024, Suburban purchased water rights. However, these purchases were completed before
5 the Decision, which denied water rights in the rate base because they were not cost-
6 effective.⁷ Because the water rights were denied in the 2024 decision, Suburban is now
7 selling them.⁸ Table 1-3 below shows the difference between Suburban’s and Cal
8 Advocates’ calculations for assets that are not used and useful.

9 **Table 1-4: Adjustments for Not Used and Useful Projects⁹**

	Suburban’s Water Rights Amount	Cal Advocates Recommended Water Rights Amount	Difference
	\$1,144,825	\$0	\$1,144,825
	\$694,000	\$0	\$694,000
Total	\$1,838,825	\$0	\$1,838,825

10
11 The Commission denied Suburban’s request to add the water rights to its rate base
12 in its last GRC, and now, in this GRC, Suburban states that it intends to sell the rights.¹⁰
13 Therefore, the Commission should reduce \$1,838,825 for water rights in future rates, as it
14 is unreasonable for ratepayers to fund projects that are not used or useful.

15 **D. Cost of Early Retirements Should Not be Shifted to**
16 **Ratepayers**

17 In ratemaking, an asset is fully depreciated when retired at the end of its estimated
18 useful service life. An early retirement occurs when an asset is retired from service earlier
19 than the useful service life and has a net book value ("NBV") at the time of retirement.
20 When this occurs, the asset did not meet the useful service life because it was not fully

⁷ (D.) 24-12-030, issued in December 2024.

⁸ Lopez Direct Testimony PUBLIC PDFa at 15, lines 4 through 10.

⁹ RO model workbook “A.26-01-___”, sheet “MODEL.”

¹⁰ Lopez Direct Testimony PUBLIC PDFa at 15, lines 4 through 10.

1 depreciated at retirement time. The Commission’s Standard Practice U-4-W ("SP U-4-
2 W") states unexpected early retirements can be “extraordinary obsolescence” and “may
3 require some form of an adjustment.”¹¹ Instead of recognizing a loss when there is an
4 early retirement, the standard ratemaking for utility retirements shifts the cost on to
5 ratepayers.

6 Below is an example of a Suburban asset that Suburban retired early at ratepayers’
7 expense. If Suburban had retired the asset at the end of its service life it would have saved
8 ratepayers from unnecessarily paying \$244,531 on the early retirement.¹²

9 Suburban had the well asset 20011875 - Plant 409 W3 Redevelop added to service
10 on 09/30/2018.¹³ Based on the survivor curve, it had an estimated useful life of 40 years,
11 yet Suburban retired it on 10/31/2021, with a remaining useful life of 92%.^{14, 15, 16} The
12 original cost was \$283,954, the net salvage percentage was -20%, and the NBV at the
13 time of retirement was \$244,531^{17, 18}. To retire this asset, the original cost of \$283,954
14 was removed from the utility plant in service account and \$283,954 was removed from
15 the accumulated depreciation reserve. Since the asset had just been depreciated for three
16 years, the depreciation reserve had only accumulated \$39,422.¹⁹ By removing \$283,954

¹¹ Standard Practice for Determination of Straight-Line Remaining Life Depreciation Accruals.

¹² Original Cost-Accumulated Depreciation = NBV; 244,531-39,422 = 244,531.

¹³ Attachment 1-1: Response to A2601001 Public Advocates Office DR CHA-003 (Rate Base and AMI) Question 1d.

¹⁴ Attachment 1-1: Response to Question 1d.

¹⁵ Attachment 1-2: Cal Advocates Calculations for Early Retirements.

¹⁶ Spanos Direct Testimony PDF, Table 1. Summary of Estimated Survivor Curve, Net Salvage Percent, Original Cost, Book Depreciation Reserve and Calculated Annual Depreciation Accruals Related to Water Plant as of December 31, 2024.

¹⁷ Original Cost-Accumulated Depreciation = NBV; 244,531-39,422 = 244,531.

¹⁸ Spanos Direct Testimony PDF, Table 1.

¹⁹ Years in Service*Annual Depreciation = Accumulated Depreciation; 3.087671233*12,767.69 = 39,422 where Annual Depreciation = (Original Cost-Net Salvage Amount)*Depreciation Rate; (244,531-340744.20)*3.75% = 12,768.

1 from the depreciation reserve, the net balance in the reserve for this asset is -\$244,531.²⁰
 2 Since plant accounts are added to rate base and the accumulated depreciation reserve is
 3 subtracted, the effect on rate base would be an addition of \$244,531, as calculated above.
 4 However, had the asset reached its full service life and fully depreciated, there would be
 5 no impact on rate base. The \$283,954 subtracted from the depreciation reserve would
 6 offset the accumulated depreciation of \$283,954.

7 Historically, the Commission has classified assets with 50% or more of their
 8 useful life remaining at the time of retirement as extraordinary retirements.²¹

9 Table 1-4 below shows Cal Advocates calculations that should be added to the
 10 depreciation reserve to counteract the under accumulation in the depreciation reserve
 11 because of early retirements.

12 **Table 1-5: Adjustments for Early Retirements^{22, 23, 24, 25}**

Retirement Year	Number of Assets Retired at 50% Remaining Life or Greater	Cal Advocates Proposed NBV to Add to Depreciation Reserve
2020	9	\$48,184
2021	40	\$589,458
2022	10	\$63,881
2023	14	\$70,560
2024	10	\$160,957
Total	83	\$933,040

13

14

²⁰ 39,422-283,954 = 244,531.

²¹ Decision 24-12-030.

²² Attachment 1-1: Response to Question 1c. Used depreciation rates in D.1905029 for assets retired in 2020, D.2110024 for assets retired from 2021-2023, and D.2412030 for assets retired in 2024.

²³ Attachment 1-1: Response to Question 1d.

²⁴ Used Summary of Estimated Survivor Curve, Net Salvage Percent, Original Cost, Book Depreciation Reserve and Calculated Annual Depreciation Accruals Related to Water Plant as of December 31, 2024 in Spanos Direct Testimony PDFa to get data on the useful service life and net salvage percentage.

²⁵ Attachment 1-2: Cal Advocates Calculations for Early Retirements.

1 Allowing for adjustments for extraordinary retirements aligns with the
2 Commission’s role as a substitute for competition. In a competitive environment, an asset
3 retired early would be recognized as a loss on the undepreciated asset value. Therefore,
4 the Commission should increase the depreciation reserve by \$933,040 to account for the
5 early retired projects identified above.

6 **IV. CONCLUSION**

7 The Commission should reduce total rate base by \$15,498,660 in 2026,
8 \$63,437,035 in 2027, and \$102,712,750 in 2028. The Commission should also reduce
9 Suburban’s proposed rate base budget by \$1,838,825 to remove not used and useful
10 assets, \$4,149,691 for working cash, and should increase the depreciation reserve by
11 \$933,040 to account for early retirements. Suburban “must demonstrate the
12 reasonableness of every dollar in its revenue requirement.”²⁶ These unsupported costs
13 should not be included in rates. It is also unreasonable for Suburban customers to pay for
14 assets that are not providing service or assets that did not meet their useful service life.
15

²⁶ Decision 96-12-066 at 5.

3

1 **CHAPTER 2 ANNUAL PROJECTS**

2 **I. INTRODUCTION**

3 This chapter presents the analysis and recommendations regarding Suburban’s
4 proposed annual projects.

5 **II. SUMMARY OF RECOMMENDATIONS**

6 The Commission should reduce Suburban’s proposed 2026 GRC capital budget
7 for annual projects by \$3,772,895.²⁷ Cal Advocates’ total recommended reductions for
8 the annual projects include:

- 9 • A reduction of \$36,800 for governmental projects.
- 10 • A reduction of \$41,400 for pump equipment replacement projects.
- 11 • A reduction of \$26,700 for security upgrade projects.
- 12 • A reduction of \$10,300 for fire hydrant replacement projects.
- 13 • A reduction of \$14,400 for water quality treatment improvement projects.
- 14 • A reduction of \$5,900 for control valve refurbishment projects.
- 15 • A reduction of \$2,000 for tools, shops, and garage equipment projects.
- 16 • A reduction of \$14,800 for meter boxes & lids projects.
- 17 • A reduction of \$127,761 for meter purchase projects.
- 18 • A reduction of \$37,434 for meter installation projects.
- 19 • A reduction of \$3,455,400 for vehicle replacements projects.

20 **III. ANALYSIS**

21 **A. Ratepayers Should Not Fund Overestimated Budgets for**
22 **Various Annual Projects**

23 Suburban uses recorded amounts from Utility Plant in Service (UPIS), which
24 reflect the total capitalized cost of each asset once in service, to calculate the five-year

²⁷ All calculations are escalated to include future year inflation except for meter installation and purchase projects.

1 average used to forecast 2026 to 2028.^{28,29} These amounts “may include expenditures
 2 incurred across multiple years prior to the asset being fully completed and recorded.”³⁰
 3 However, it is more reasonable to use annual amounts to forecast future costs because
 4 ratepayers will benefit from paying the actual annual costs incurred in a calendar year.
 5 UPIS placement-year data depend on when projects are completed, which may overstate
 6 some years and understate others. The resulting average may be driven by project
 7 completion timing rather than underlying investment levels. Tables 2-1 through 2-8
 8 below show the difference between Suburban's and Cal Advocates’ calculations to
 9 forecast costs for future years. Cal Advocates correctly applies the recorded annual costs
 10 in the RO model.

11 **Table 2-1: Adjustments for Governmental Projects**

9

Additionally, in response to discovery, Suburban stated that the RO model had incorrectly recorded values for governmental projects, pump equipment replacement projects, and security upgrade projects, and provided updated values that include additional costs.^{47, 48} However, the DR does not provide support for the additional costs. Since Suburban “must demonstrate the reasonableness of every dollar in its revenue requirement,” Cal Advocates is calculating future costs using recorded data provided in the RO model.⁴⁹

10

11

12

13

Suburban should use annual costs to forecast annual project costs. Using that method benefits ratepayers and results in a reduction of \$49,200 in 2026, \$50,900 in 2027, and \$52,200 in 2028 for annual projects in tables 2-1 through 2-8. These calculations account for the actual costs reported in the RO model.

⁴⁸ Attachment 2-1: Response to Question 6.

⁴⁹ Decision 96-12-066 at 5.

B. Ratepayers Should Not Fund Overestimated Budgets for Meter Purchase and Installation Projects

Suburban states in testimony that for 2026, the company proposes 1048 retrofit registers and in 2027 it proposes 1,407 retrofit registers.⁵⁰ Retrofit registers will make meters that are less than 15 years old, “compatible with smart meter reading methods.”⁵¹ However, in response to discovery provided by Suburban, where it was asked to provide details on meter purchase projects, there is only data on 570 retrofit registers for 2026 and 1,042 retrofit registers for 2027.⁵² Suburban also states in testimony that meter installation costs are based on the meter purchases.⁵³ Therefore, there is missing data for 478 retrofit registers proposed in 2026 and 5 retrofit registers proposed in 2027. Tables 2-9 and 2-10 below show the difference between Suburban and Cal Advocates’ calculations for retrofit registers.

Table 2-9: Adjustments for Meter Purchase Projects

Year	Unit Cost	Number of Retrofit Registers Listed in Testimony	Number of Retrofit Registers Listed in DR	Suburban’s Calculations ⁵⁴	Cal Advocates Calculations	Difference
2026	\$264	1,048	570	\$276,672	\$150,480	\$126,192
2027	\$272	1,047	1,042	\$284,993	\$283,424	\$1,569
Total	-	-	-	\$561,665	\$433,904	\$127,761

⁵⁰ Lopez Direct Testimony PUBLIC PDFa at 87, lines 1 through 2 and at 216, lines 5 through 6.

⁵¹ Lopez Direct Testimony PUBLIC PDFa at 86, lines 3 through 5.

⁵² Attachment 2-1: Response to Question 16.

⁵³ Lopez Direct Testimony PUBLIC PDFa at 99, lines 3 through 4.

⁵⁴ Lopez Direct Testimony PUBLIC PDFa at 87, lines 1 through 2 and at 216, lines 5 through 6.

Table 2-10: Adjustments for Meter Installation Projects

Year	Unit Cost	Number of Retrofit Registers Listed in Testimony	Number of Retrofit Registers Listed in DR	Suburban’s Calculations ⁵⁵	Cal Advocates Calculations	Difference
2026	\$77.48	1,048	570	\$81,199	\$44,164	\$37,035
2027	\$79.72	1,047	1,042	\$83,467	\$83,068	\$399
Total	-	-	-	\$164,666	\$127,232	\$37,434

Suburban did not provide adequate data on all retrofit registers it proposed in its testimony. Therefore, the Commission should reduce \$163,227 in 2026 and \$1,968 in 2027 for meter purchase and installation projects. These calculations account for the amount of retrofit registers Suburban provided data for in its discovery response.

C. Ratepayers Should Not Fund Overestimated Budgets for Vehicle Replacement Projects

Suburban is proposing \$651,976 in 2026, \$2,877,943 in 2027, and \$1,647,338 in 2028 for vehicle replacements.⁵⁶ Based on recorded costs from 2020 to 2024, Suburban spent as little as \$11,511 in 2022 to as much as \$935,860 in 2024 on replacements.⁵⁷ The proposed 2027 vehicle replacement cost is more than double the recorded vehicle replacement costs for any year from 2020 to 2024. Therefore, the Commission should adopt a vehicle replacement budget that is based on a 5-year average using annual costs because it is more representative of Suburban’s actual vehicle replacement needs. Table 2-11 below shows the difference between Suburban and Cal Advocates calculations for vehicle replacements.

⁵⁵ Lopez Direct Testimony PUBLIC PDFa at 100 and 219.

⁵⁶ Lopez Direct Testimony PUBLIC PDFa at 117, line 1.

⁵⁷ RO model workbook “A.26-01-___”, sheet “MODEL.”

Table 2-11: Adjustments for Vehicle Replacement Projects

Year	Suburban’s Calculations ⁵⁸	Cal Advocates Calculations ⁵⁹	Difference
2026	\$652,000	\$557,300	\$94,700
2027	\$2,877,000	\$573,400	\$2,303,600
2028	\$1,647,000	\$589,900	\$1,057,100
Total	\$5,176,000	\$1,720,600	\$3,455,400

Using the five-year average to forecast 2026 to 2028 costs, benefits ratepayers and results in a reduction of \$94,700 in 2026, \$2,303,600 in 2027, and \$1,057,100 in 2028.

IV. CONCLUSION

The Commission should reduce Suburban’s proposed capital project budget for annual projects by \$3,772,895. It is inaccurate for Suburban to use UPIS amounts rather than annual amounts to forecast future project costs and not use a five-year average to forecast costs for vehicle replacements. It is also unreasonable for Suburban to propose additional costs to recorded data, as well as retrofit registers and not provide adequate data regarding these costs, because Suburban “must demonstrate the reasonableness of every dollar in its revenue requirement.”⁶⁰

⁵⁸ Lopez Direct Testimony PUBLIC PDFa at 116, lines 1 through 2 and at 117, line 1.

2

1 **CHAPTER 3 ADVANCED METERING INFRASTRUCTURE (AMI)**

2 **I. INTRODUCTION**

3 This chapter presents the analysis and recommendations regarding Suburban’s
4 proposed AMI project.

5 **II. SUMMARY OF RECOMMENDATIONS**

6 The Commission should reduce Suburban’s proposed 2026 GRC capital budget
7 for AMI projects by <<begin confidential>> ██████████ <<end confidential>>. Cal
8 Advocates’ total recommended reductions for the AMI projects include:

9 A reduction of <<begin confidential>> ██████████ <<end confidential>> for the
10 construction inspector (consultant) position.

11 **III. ANALYSIS**

12 **A. Ratepayers Should Not Fund Less Cost-Effective**
13 **Alternatives**

14 Suburban proposes \$206,400 in 2028 to hire an external inspector for AMI
15 projects.⁶¹ This is unreasonable because it is less expensive to use an internal inspector to
16 fill this position than it is to outsource this position. In fact, Suburban admits to this by
17 stating that “Suburban’s internal staff performs engineering work at a lower cost than
18 external consultants. Consultant fees are marked up to generate profit for their firms and
19 include overhead for marketing and corporate costs, making them more expensive.
20 Internal labor does not include profit margins and offers better value over time.”⁶² Table
21 3-1 below shows the difference between Suburban and Cal Advocates calculations and
22 compares the costs if Suburban uses an in-house employee vs an external employee for
23 the inspector position.

⁶¹ Lopez Direct Testimony PUBLIC PDFa at 427, line 1.

7
8
9
10
11

Table 3-1: Adjustments for AMI Projects⁶³

<<begin confidential>>

Year	[REDACTED]
2028	

<<end confidential>>

Since it is more cost-effective for Suburban to use an internal inspector rather than an external inspector, the Commission should reduce <<begin confidential>> [REDACTED] <<end confidential>> in 2028 to the inspector position for AMI projects.

IV. CONCLUSION

The Commission should reduce Suburban’s proposed capital project budget for AMI projects by <<begin confidential>> [REDACTED] <<end confidential>>. It is unreasonable for Suburban to burden ratepayers by expecting them to pay for an external inspector when a more cost-effective alternative is available.

⁶³ Lopez Direct Testimony CONFIDENTIAL PDF/A corrected Feb 26 at 56, lines 14 through 16.

⁶⁴ Lopez Direct Testimony PUBLIC PDF/A at 427, line 1.

1 **CHAPTER 4 DEPRECIATION RESERVE AND EXPENSE**

2 **I. INTRODUCTION**

3 This chapter presents the analysis and recommendations regarding Suburban’s
4 proposed depreciation reserve and expense.

5 **II. SUMMARY OF RECOMMENDATIONS**

6 The Commission should reduce Suburban’s proposed 2026 GRC capital budget
7 for depreciation reserve and expense by \$12,051,781. Cal Advocates’ total recommended
8 reductions for the depreciation reserve and expense include a reduction of \$12,051,781
9 for the cost of removal.

10 **III. ANALYSIS**

11 **A. Ratepayers Should Not Fund Unsupported Cost of**
12 **Removal**

13 For cost of removal, Suburban proposes \$7,522,956 in 2026, \$7,861,639 in 2027,
14 and \$8,197,586 in 2028.⁶⁵ However, these values are hardcoded in the RO model and
15 there is no detailed testimony on how the cost of removal amounts were calculated.
16 Additionally, for all four cost of removal areas (valves and miscellaneous pipelines
17 (Transmission & Distribution (T&D)), service replacements, hydrants, and meter
18 installations) the forecasted cost of removal is the same as the proposed additions, which
19 does not make sense.⁶⁶ For example, in 2026 Suburban proposes \$3,675,600 for service
20 replacements under annual projects, yet the cost of removal proposed in 2026 for services
21 is also \$3,675,600.⁶⁷ Due to a lack of data, Cal Advocates uses a five-year (2020-2024)
22 average of cost of removal to forecast the cost of removal for future years.⁶⁸ Table 4-1

⁶⁵ RO model workbook “A.26-01-___ “, sheet “MODEL.”

⁶⁶ Attachment 4-1: Response to A2601001 Public Advocates Office DR CHA-003 (Rate Base and Depreciation) Questions 4 through 6.

⁶⁷ RO model workbook “A.26-01-___ “, sheet “MODEL.”

⁶⁸ Account 347 for meter installations had no data for cost of removal in the Summary of Book Salvage in Spanos Direct Testimony PDFa, so to calculate the five-year average cost of removal, data from accounts

1 below shows the difference between Suburban and Cal Advocates calculations for cost of
 2 removal.

3 **Table 4-1: Adjustments for Depreciation Reserve and Expense**

Year	Account Number	Description	Suburban's Calculations ⁶⁹	Cal Advocates Calculations ^{70, 71}	Difference
2026	343	T&D	\$2,547,000	\$1,551,100	\$995,900
2027	343	T&D	\$2,620,600	\$1,596,000	\$1,024,600
2028	343	T&D	\$2,696,400	\$1,642,100	\$1,054,300
2026	345	Service Replacements	\$3,675,600	\$1,593,500	\$2,082,100
2027	345	Service Replacements	\$3,899,600	\$1,639,600	\$2,260,000
2028	345	Service Replacements	\$4,123,600	\$1,687,000	\$2,436,600
2026	347	Meters Installations	\$370,156	\$350,800	\$19,356
2027	347	Meters Installations	\$384,339	\$361,000	\$23,339
2028	347	Meters Installations	\$392,886	\$371,400	\$21,486
2026	348	Hydrants	\$930,200	\$239,000	\$691,200
2027	348	Hydrants	\$957,100	\$245,900	\$711,200
2028	348	Hydrants	\$984,700	\$253,000	\$731,700
Total	-	-	\$23,582,181	\$11,530,400	\$12,051,781

4
 5 When Cal Advocates asked Suburban in discovery how the cost of removal is
 6 forecasted and to explain how the cost of removal could be the same as the cost for new
 7 project additions, Suburban stated that to estimate the cost of removal and installation,
 8 “[Suburban] split[s] the total cost estimate evenly (50/50) between removal and

346 through 346.20 (meters) was used.

⁶⁹ RO model workbook “A.26-01-___”, sheet “MODEL.”

⁷⁰ Attachment 4-2: Cal Advocates Calculations for Cost of Removal.

⁷¹ All calculations are escalated to include future year inflation.

1 installation.”⁷² This response does not provide any support on why the cost of removal is
2 equivalent to the cost of additions.

3 Since there is a lack of data on how Suburban calculates cost of removal, the
4 Commission should reduce \$3,788,556 in 2026, \$4,019,139 in 2027, and \$4,244,086 in
5 2028 to the depreciation reserve and expense for cost of removal. These calculations
6 account for the five-year average cost of removal that Cal Advocates used to forecast
7 future cost of removal amounts.

8 **IV. CONCLUSION**

9 The Commission should reduce Suburban’s proposed capital project budget for
10 depreciation reserve and expense by \$12,051,781. It is unreasonable for Suburban to
11 propose a cost of removal and not provide adequate data, support or justification
12 regarding it because Suburban “must demonstrate the reasonableness of every dollar in its
13 revenue requirement.”⁷³

5 Q.1 Please state your name and address.

6 A.1 My name is Chandrika Sharma, and my business address is 505 Van Ness
7 Avenue, San Francisco, California, 94102.

8

9 Q.2 By whom are you employed and what is your job title?

10 A.2 I am employed by the California Public Utilities Commission as a Utilities
11 Engineer.

12

13 Q.3 Please describe your educational and professional experience.

14 A.3 I have a Bachelor of Science Degree in Computer Engineering with a Electrical
15 Engineering minor from San Francisco State University and an MBA from San
16 José State University. I have been with the California Public Utilities Commission
17 since October 2021.

18

19 Q.4 What is your area of responsibility in this proceeding?

20 A.4 I am responsible for Chapter 1 (Rate Base), Chapter 2 (Annual Projects), Chapter
21 3 Advanced Metering Infrastructure (AMI), and Chapter 4 (Depreciation Reserve
22 and Expense).

23

24 Q.5 Does that complete your prepared testimony?

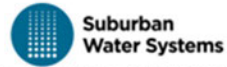

25 A.5 Yes.

Re.: Responses to A.26-01-001, Public Advocates Office DR CHA-003 (Rate Base and AMI)

Dear Ms. Sharma et al.,

Attached is the information you requested in writing for Suburban's Total Company General Rate Case.

Sincerely,

/s/Carmelitha Bordelon

Carmelitha Bordelon
Vice President, Regulatory Affairs & Finance

**Responses to A.26-01-001, Public Advocates Office
DR CHA-003 (Rate Base and AMI)**

1. In response to Question 17, DR SIB-001, Suburban provided "17. Table 6-5 2020-2024 Retirements Detail." For all the sheets in the workbook, please create and populate columns for the following assets:
 - a. Useful service life in years (the estimated service life when the asset was placed in service).

Response:
Suburban applies group depreciation rates to assets. The average service life and survivor curve are applied to all assets.
 - b. Salvage value or cost associated with the retired asset.

Response:
Refer to file titled "1b. Salvage 2020-2024.xlsx"
 - c. Depreciation rate.

Response:
Suburban does not apply depreciation rates on an individual-asset basis. Instead, depreciation is calculated using group asset categories. Refer to file titled "1c, 2c. CHA-003 Depreciation Rates.xlsx" for the Commission-authorized group asset depreciation rates, organized by Decision number beginning with calendar year 2003 depreciation rates.
 - d. Original recorded cost.

Response:
Refer to file titled "1.d. Follow-up on SIB-001 #17 2020-2024 Retirement Details.xlsx."

Re.: PARTIAL RESPONSE #1 to A.26-01-001, Public Advocates Office DR CHA-002
(Annual Projects)

Dear Ms. Sharma et al.,

Attached is the information you requested in writing for Suburban's Total Company General Rate Case for questions 1 through 5, and 14 through 17.

Suburban will provide responses for questions 6 through 13, no later than Marh 17, 2026.

Sincerely,

/s/ Carmelitha Bordelon

Re.: PARTIAL RESPONSE #2 (LAST) to A.26-01-001, Public Advocates Office DR CHA-002 (Annual Projects)

Dear Ms. Sharma et al.,

Attached are Suburban's complete written responses to data request CHA-002, including responses to questions 1 through 5, and 14 through 17 which were provided on March 9, 2026.

Sincerely,

/s/Carmelitha Bordelon

Vice President, Regulatory Affairs & Finance

Responses to A.26-01-001, Public Advocates Office
DR CHA-002 (Annual Projects)

6. Page 90 in “Lopez Direct Testimony CONFIDENTIAL PDFA corrected” states that for security upgrades the 2023 recorded cost was \$403,378 and in 2024 was \$176,819. However, in the RO model workbook “A.26-01-___,” in the sheet “MODEL,” it states that the 2023 recorded cost was \$363,584 and in 2024 was \$176,475. Please explain the discrepancies.

Response:

The difference is due to the distinct purposes of the two documents and the way costs are recorded and reported.

The amounts presented in the Direct Testimony are intended to show historical security upgrade costs for the purpose of forecasting future needs. Accordingly, the Testimony relies on recorded Plant in Service amounts, which reflect the total capitalized cost of each asset once placed into service. These amounts may include expenditures incurred across multiple years prior to the asset being fully completed and recorded, and therefore do not necessarily align with annual project spending.

By contrast, the RO Model tracks the Company’s **annual capital project expenditures** based on company-funded amounts incurred within a specific calendar year. The RO Model reflects the timing of cash outlays, accruals, and funding activity rather than total installed asset cost. As such, the RO Model figures represent capital spending recorded in those individual years only.

Because the Testimony and the RO Model present costs in different contexts: total asset cost versus annual spending, and the amounts do not always match on a year-by-year basis. The Testimony reflects proposed or historical project cost levels used for ratemaking forecasts, while the RO Model reflects the Company’s funded expenditures by year. Differences between the two are therefore expected and do not indicate an inconsistency in underlying cost recovery.

In addition, Suburban’s review of the data provided in response to SIB-001, Question 13 identified a data cut-off issue affecting certain historical reporting. That report will be updated on March 18, 2026 to reflect corrected recorded information. Suburban will correspondingly update the RO Model to ensure consistency with the corrected data.

Finally, it is important to note that the company-funded expenditure amounts reflected in the RO Model provide information solely on projects funded in a particular year. Those amounts do not represent the full cost of assets placed into service and therefore are not directly comparable to the Plant in Service amounts used in Testimony. The use of both data sources is appropriate, as each serves a different and complementary purpose in the Commission’s ratemaking review.

7. Page 69 in “Lopez Direct Testimony CONFIDENTIAL PDFa corrected” states that for governmental projects the recorded cost in 2021 was \$74,277, in 2022 was \$131,313, in 2023 was \$281,561, and in 2024 was \$172,296. However, in the RO model workbook “A.26-01-___,” in the sheet “MODEL,” it states that the 2021 recorded cost was \$79,138, in 2022 was \$126,452, in 2023 was \$262,353, and in 2024 was \$135,070. Please explain the discrepancies.

[Response:](#)

[Please see response 6 above.](#)

8. Page 71 in “Lopez Direct Testimony CONFIDENTIAL PDFa corrected” states that for pump equipment replacements the recorded cost in 2023 was \$528,538, and in 2024 was \$314,716. However, in the RO model workbook “A.26-01-___,” in the sheet “MODEL,” it states that recorded cost in 2023 was \$498,371, and in 2024 was \$282,017. Please explain the discrepancies.

[Response:](#)

[Please see response 6 above.](#)

9. Page 92 in “Lopez Direct Testimony CONFIDENTIAL PDFa corrected” states that for fire hydrant replacements the recorded cost in 2020 was \$811,946, in 2021 was \$632,800, in 2022 was \$858,904, in 2023 was \$662,340, and in 2024 was \$1,025,154. However, in the RO model workbook “A.26-01-___,” in the sheet “MODEL,” it states that the 2020 recorded cost was \$818,878, in 2021 was \$638,424, in 2022 was \$846,356, in 2023 was \$650,143, and in 2024 was \$1,019,455. Please explain the discrepancies.

[Response:](#)

[Please see response 6 above.](#)

10. Page 96 in “Lopez Direct Testimony CONFIDENTIAL PDFa corrected” states that for water quality treatment improvements the recorded cost in 2020 was \$42,488. However, in the RO model workbook “A.26-01-___,” in the sheet “MODEL,” it states that the 2020 recorded cost was \$25,594. Please explain the discrepancy.

11. Page 104 in “Lopez Direct Testimony CONFIDENTIAL PDFa corrected” states that for control valve (cla-val) refurbishments the recorded cost in 2023 was \$84,616. However, in the RO model workbook “A.26-01-___,” in the sheet “MODEL,” it states that the 2020 recorded cost was \$75,977. Please explain the discrepancy.

[Response:](#)

[Please see response 6 above.](#)

12. Page 66 in “Lopez Direct Testimony CONFIDENTIAL PDFa corrected” states that for service replacements the cost in 2020 was \$2,260,316, in 2021 was \$2,594,531, in 2022 was \$2,910,233, in 2023 was \$2,770,779, and in 2024 was \$3,382,820. However, in the

RO model workbook “A.26-01-___,” in the sheet “MODEL,” it states that the 2020 recorded cost was \$2,663,822, in 2021 was \$2,667,538, in 2022 was \$2,809,124, in 2023 was \$2,762,330, and in 2024 was \$3,382,594. Please explain the discrepancies.

Response:

Please see response 6 above.

13. Page 101 in “Lopez Direct Testimony CONFIDENTIAL PDFA corrected” states that for air release assembly replacements the cost in 2020 was \$90,123 and in 2024 was \$98,943. However, in the RO model workbook “A.26-01-___,” in the sheet “MODEL,” it states that the 2020 recorded cost was \$61,094 and in 2024 was \$81,729. Please explain the discrepancies.

Response:

Please see response 6 above.

16. For each of the meters Suburban is proposing to replace as part of the meter purchase projects, as discussed in “Lopez Direct Testimony CONFIDENTIAL PDFA corrected”, please populate the fields in the format of the table below in MS Excel:

Asset Group	Asset Name	Meter Size	Date Added to Service	Year of Replacement

Response:

Please see the Excel file entitled “DR CHA-002 #16 Response _Meter Replace.xlsx”.

Question 16:

Re.: Responses to A.26-01-001, Public Advocates Office DR CHA-005 (Annual
Projects and Rate Base)

Dear Ms. Sharma et al.,

Attached is the information you requested in writing for Suburban's Total Company
General Rate Case.

Sincerely,

/s/ Carmelitha Bordelon

Carmelitha Bordelon
Vice President, Regulatory Affairs & Finance

Responses to A.26-01-001, Public Advocates Office

DR CHA-005 (Annual Projects and Rate Base)

1. How is Suburban calculating the five-year average for 2020-2024 to forecast future year (2026-2028) costs for the following annual projects? Does Suburban use recorded annual amounts, record Utility Plant in Service amounts, or another method?
 - a. Tools, Shops, and Garage Equipment
 - b. Meters Box & Lids

Responses a – b:

As shown in the Direct Testimony of Jorge Lopez, section R-11 (Tools, Shop and Garage Equipment) pages 94 & 95 and section R-21 (Meter Boxes & Lids) pages 105 & 106, Suburban used a five-year historical average in Utility Plant in Service from 2020–2024 to determine future costs. These costs represent the total capitalized cost of the assets once they were placed into service.

Re.: Responses to A.26-01-001, Public Advocates Office DR CHA-004 (Rate Base and Depreciation)

Dear Ms. Sharma et al.,

Attached is the information you requested in writing for Suburban's Total Company General Rate Case.

Sincerely,

/s/ Carmelitha Bordelon

Carmelitha Bordelon
Vice President, Regulatory Affairs & Finance

Questions five through seven refer to Table 7-4, which lists the cost of removal under the depreciation reserve. The forecasted cost of removal is \$7,522,956 for 2026, \$7,861,639 for 2027, and \$8,197,586 for 2028.

4. **2026 Cost of Removal:** The 2026 total amount comprises of a cost of removal of \$2,547,000 for T&D (valves and miscellaneous pipelines), \$3,675,600 for service replacements, \$370,156 for meter installations, and \$930,200 for hydrants:

- a. Please explain how Suburban is forecasting the cost of removal for T&D.

Response:

Suburban's annual Transmission & Distribution (T&D) CAPEX spend is used to reactively replace pipes and valves that fail; this does not include planned pipe replacements. When a valve or section of pipeline needs to be replaced, the failed pipe

or valve is typically removed, and a new one is installed in the same location. This means that the same excavation, backfill, and surface improvements are used for both the removal and new installation. To estimate the cost of removal and installing the pipe or valve, we split the total cost estimate evenly (50/50) between removal and new installation. Based on this approach, we forecasted:

- \$1,223,700 for valve removal and \$1,223,700 for valve installation.
- \$1,323,300 for pipeline removal, and \$1,323,000 for pipeline installation.

- b. Please explain how the 2026 cost for T&D replacements and the cost of removal for T&D can be the same (\$2,547,000).

Response:

See response 4. a. above.

- c. Please explain how Suburban is forecasting the cost of removal for service replacements.

Response:

Suburban's service replacement CAPEX spend is used to reactively replace services that fail; this does not include planned service replacements. When a service needs to be replaced, the failed service is typically removed as the new service is being installed. A new service is attached to the old service and pulled into place, using the opening from the existing service and replacing the old line in one motion. Pulling a new service does not require digging a full trench along the service line; it only requires pits at the start and end of the service line. To estimate the cost of service removal and installation, we split the total cost estimate evenly (50/50) between removal and installation. Based on this approach, we forecasted:

- \$3,675,600 for service removal and \$3,675,600 for service installation.

- d. Please explain how the 2026 cost for service replacements and the cost of removal for service replacements can be the same (\$3,675,600).

Response:

See response 4. c. above.

- e. Please explain how Suburban is forecasting the cost of removal for fire hydrants.

Response:

Suburban's fire hydrant replacement CAPEX spend is used to reactively replace fire hydrants that fail; this does not include planned fire hydrant replacements. Fire hydrants are replaced as new pipelines are installed in accordance with GO 103-A, section 3. B. When a fire hydrant needs to be replaced, the fire hydrant is typically removed, and a new one is installed in the same location. This means that the same excavation, backfill, and surface improvements are used for both the removal and new installation. To estimate the cost of removal and installing the fire hydrant we split the

total cost estimate evenly (50/50) between removal and new installation. Based on this approach, we forecasted:

- \$930,200 for fire hydrant removal and \$930,200 for fire hydrant installation.

f. Please explain how the 2026 cost for fire hydrant replacements and the cost of removal for fire hydrants can be the same (\$930,200).

Response:

See response 4. e. above.

g. Please show how the cost of removal was calculated for meter installations.

Response:

Suburban's meter installations CAPEX is used to pay for the labor to replace meters that have exceeded Suburban's replacement age. This category does not include meter purchase costs that are recorded as a separate line item because they are accounted for differently. When a meter needs to be replaced, the existing meter is typically removed, and a new one is installed in the same meter box in between existing valving. Removing the old meter accounts for half of the labor required to install the new meter. To estimate the cost of removal and meter installation, we split the total cost estimate evenly (50/50) between removal and new installation. Based on this approach, we forecasted:

- \$740,312 Total project cost; \$370,156 for meter removal and \$370,156 for meter installation. The meter installation budget was inadvertently not reduced for the cost of removal.

5. **2027 Cost of Removal:** The 2027 total amount comprises of a cost of removal of \$2,620,600 for T&D (valves and miscellaneous pipelines), \$3,899,600 for service replacements, \$384,339 for meter installations, and \$957,100 for hydrants:

a. Please explain how Suburban is forecasting the cost of removal for T&D?

Response:

See response 4. a. above.

- \$1,259,100 for valve removal and \$1,259,100 for valve installation.
- \$1,361,500 for pipeline removal, and \$1,361,900 for pipeline installation.

b. Please explain how the 2027 cost for T&D replacements and the cost of removal for T&D can be the same (\$2,620,60).

Response:

See response 4. a. above.

- c. Please explain how Suburban is forecasting the cost of removal for service replacements.
Response:
See response 4.c above.
- \$3,899,600 for service removal and \$3,899,600 for service installation.
- d. Please explain how the 2027 cost for service replacements and the cost of removal for service replacements can be the same (\$3,899,600).
Response:
See response 4. c. above.
- e. Please explain how Suburban is forecasting the cost of removal for fire hydrants.
Response:
See response 4. e. above.
- \$957,100 for fire hydrant removal and \$957,100 for fire hydrant installation.
- f. Please explain how the 2027 cost for fire hydrant replacements and the cost of removal for fire hydrants can be the same (\$957,100).
Response:
See response 4. e. above
- g. Please show how the cost of removal was calculated for meters installations.
Response:
See response 4.g.
- \$768,677 Total project cost; \$384,339 for meter removal and \$384,339 for meter installation. The meter installation budget was inadvertently not reduced for the cost of removal.
6. **2028 Cost of Removal:** The 2028 total amount comprises of a cost of removal of \$2,696,400 for T&D (valves and miscellaneous pipelines), \$4,123,600 for service replacements, \$392,886 for meters installations, and \$984,700 for hydrants:
- a. Please explain how Suburban is forecasting the cost of removal for T&D?
Response:
See response 4.a. above.
- \$1,295,500 for valve removal and \$1,295,500 for valve installation.
 - \$1,400,900 for pipeline removal, and \$1,400,900 for pipeline installation.

- b. Please explain how the 2028 cost for T&D replacements and the cost of removal for T&D can be the same (\$2,696,400).
Response:
See response 4. a. above.
- c. Please explain how Suburban is forecasting the cost of removal for service replacements.
Response:
See response 4. c. above.
- \$4,123,600 for service removal and \$4,123,600 for service installation.
- d. Please explain how the 2028 cost for service replacements and the cost of removal for service replacements can be the same (\$4,123,600).
Response:
See response 4. c. above.
- e. Please explain how Suburban is forecasting the cost of removal for fire hydrants.
Response:
See response to 4.e. above.
- \$984,700 for fire hydrant removal and \$984,700 for fire hydrant installation.
- f. Please explain how the 2027 cost for fire hydrant replacements and the cost of removal for fire hydrants can be the same (\$984,700).
Response:
See response 4. e. above.
- g. Please show how the cost of removal was calculated for meters installations.
Response:
See response 4.g. above
- \$785,772 Total project cost; \$392,886 for meter removal and \$392,886 for meter installation. The meter installation budget was inadvertently not reduced for the cost of removal.
